SUMMARY

Full-stack software engineer with 8+ years building and shipping products across web, mobile, and AI. Founding engineer at YC-backed and acquired startups, and founder of six live products. Scaled an edtech platform to **100K+ users**, built a Figma plugin used by **75K+ designers**, and architected an FDA-targeted clinical AI platform, owning everything from design systems to multi-agent backends.

TECHNICAL SKILLS

Web & Mobile: TypeScript, JavaScript, React, Next.js, React Native (iOS/Android), Tailwind CSS, Design Systems

Backend & Infra: Node.js, NestJS, Hono, PostgreSQL, MongoDB, Redis, GraphQL, AWS, Docker, CI/CD, Vercel, Railway

AI Engineering: LLM Integration, Multi-Agent Systems, RAG Pipelines, AI Coding Harnesses (Claude Code, Cursor), Forward-Deployed Engineering

BUILDING

- **Tora** usetora.com · Native macOS app (Swift) with four AI agents in the notch: dictation, writing, meeting notes, and live call replies. **Just launched**.
- **Superframes** superframes.io · Private AI video editor that runs on-device via WebAssembly, in the browser and on desktop. **2K+ MAU**.
- **ihateaudio** ihateaudio.com · 49 free audio tools that run in the browser, with no uploads and no signup. **10K+ impressions**.
- **Phren** phren.app · Personal alignment engine: one-keystroke capture, background LLM classification, and a calm daily view.
- **RemixMart** remixmart.com · AI image and video generation community. **100+ Product Hunt upvotes**; v2 with ad remixing soon.
- **Imagefall** imagefall.com · AI product photography for Shopify: one phone photo in, a full product listing out.
- **Image2Vector** Figma plugin · Converts any image to vector, right inside Figma. **75K+ users**.
- A few more on harsh.im.

EXPERIENCE

Stealth Startup | Founding Engineer — May 2026 – Present

AI-Native Enterprise Platform · USA (Contract, Remote)

- Rebuilding a platform that serves **80K+ enterprise users** from scratch as AI-native software.
- Bootstrapped the new pivot end to end: architecture, ops, backend, frontend, the Chrome extension, and AI agent integrations.

Regain AI | Founding Engineer — Sep 2025 – Apr 2026

Clinical AI Platform · Singapore (Contract, Remote)

- Architected an FDA-targeted clinical AI platform for the ARPA-H ADVOCATE program, designing a multi-agent reasoning system where LLM agents debate, critique, and safety-check each other before any patient recommendation surfaces.
- Built the cross-platform mobile app (iOS/Android), AI-driven clinician dashboards, and HIPAA-compliant backend infrastructure end to end.
- Personally designed the entire brand identity, logo, design system, and product ecosystem visual language, alongside engineering the platform.

Surface Labs (YC S23) | Founding Engineer — Jul 2024 – Jun 2025

AI-Powered Sales Platform · San Francisco, USA (Contract, Remote)

- Led development of the AI-powered Workflow feature, the product's core USP, automating **50K+ leads monthly** for **100+ B2B clients**.
- Designed and implemented a scalable design system adopted across the product, improving UI consistency and cutting frontend development time.

Topica Edtech Group | Senior Software Engineer — Nov 2021 – Apr 2024

Online Learning Platform · South East Asia

- Led the frontend team for NativeX, scaling the product to **100K+ users** and significantly boosting revenue.
- Established coding standards, best practices, and mentored junior developers while delivering complex features.

Waywiser.Life (Acquired) | Founding Engineer — Apr 2021 – Nov 2021

Social Platform for Seniors · Austin, USA (Contract, Remote)

- Built the full product from scratch: web (Next.js), mobile (React Native, iOS/Android), real-time notifications, admin tools, and backend (NestJS, MongoDB, AWS), growing to thousands of active senior users before acquisition.

Pratham Softwares (PSI) | Software Engineer — Jul 2019 – Apr 2021

Software Consultancy · Jaipur, India

- Delivered 4 client projects including BCG, JCurve, and Agility CIS, building data-intensive applications for complex business scenarios. Won the company's internal Automation Hackathon.

Biller | Software Engineer — Jul 2018 – Jul 2019

Restaurant Management Suite · Jaipur, India

- Built the Restaurant POS WebApp from scratch using React.js, part of a comprehensive suite of 14 applications for restaurant management.

ISRO (Indian Space Research Organisation) | Research Intern — 2017

- Built a landscape change monitoring website using BHUVAN satellite imagery. Conducted a case study on Hyderabad using Google Earth tools.
